.NET Developer

Abdourahmane GADIO

+33 7 82 48 31 28 | agadio@protonmail.com | linkedin.com/in/abdourahmane-g | github.com/AbdourahmaneGadio

Profile

Back-end developer with four years of experience building production web applications in Python, JavaScript/TypeScript and .NET. I have designed and maintained REST APIs, relational databases and automated test suites, and I work daily with Docker and CI/CD pipelines. My Java project with Spring Boot, PostgreSQL, ReactJS and Docker gave me hands-on experience of team-based web development. I am looking for a V.I.E. assignment as a .NET developer.

Experience

.NET Developer | **Apprenticeship** Oct. 2023 – Sept. 2026
Sikiwis *Suresnes, France*

- Developed a **Python** chatbot that personalises ERP modules (OpenAI API, Streamlit), tested with **Pytest** and **Docker**
- Implemented electronic invoice generation and delivery in Factur-X format via the SUPER PDP REST API
- Designed **unit and integration tests (Pytest)** and end-to-end tests (Playwright), **cutting technical errors by 15 %** on every deployment
- Automated deployments with GitLab CI/CD and Docker, **raising productivity by 40 %**
- Optimised the **.NET code** and SQL queries, **cutting the web application's load time by 30 %**
- Maintained a JavaScript interface (Leaflet, Chart.js, AJAX) consuming data from the back-end

Full-Stack and Mobile Developer | **Apprenticeship** Mar. 2023 – Feb. 2024
1Clic1Mobili *Montreuil, France*

- Built the vehicle booking platform in **PHP/MySQL**, with an **HTML, CSS and Bootstrap** interface
- Developed the companion mobile application in **Flutter** and **Dart**
- Integrated Stripe online payment and versioned the code with Git

Projects

Modytrainer | *Flutter, Dart, JavaScript (ReactJS), GraphQL* University project

- Developed a Dart and Flutter client with real-time notifications, and JavaScript (ReactJS) monitoring
- Built the data layer: GraphQL API on PostgreSQL (Prisma ORM) and Strapi content
- Automated mobile deployment to the Google Play Store
- Refreshed interface data through client-side AJAX calls

Hackathon "Leaders" | *Java, Spring Boot, ReactJS, PostgreSQL, Docker* University project

- Designed and built an online board game in five days within a team of 13 people
- Developed the server in Java and Spring Boot, with PostgreSQL persistence and real-time synchronisation of player actions
- Containerised the application with Docker and Docker Compose, and set up continuous integration with GitLab CI/CD

Technical Skills

Languages: Python, JavaScript, TypeScript, .NET, PHP, SQL, Java
Back-end: REST APIs, Node.js, ASP.NET, Spring Boot, GraphQL
Front-end: React, HTML, CSS, AJAX, Chart.js, Leaflet
Databases: PostgreSQL, MySQL, MariaDB, Prisma
Testing: Pytest, Playwright, Cypress, Selenium
Tools & DevOps: Docker, Docker Compose, GitLab CI/CD, GitHub Actions, Git
Generative AI: OpenAI API, Codex, GitHub Copilot, OpenCode, Ollama, Qwen

Education

ESIEA (Graduate School of Computer Science, Electronics and Automation) Ivry-sur-Seine, France
Master's Degree in Computer Science *Sept. 2023 – Sept. 2026*
KMUTT (King Mongkut's University of Technology Thonburi) Bangkok, Thailand
International Mobility in Thailand *May 2024 – Jul. 2024*

Languages

English: C1 certified (TOEIC 945/990), daily professional use
French: native language
